

# **1988 INTERNATIONAL CONFERENCE ON COMPUTER PROCESSING OF CHINESE AND ORIENTAL LANGUAGES**

**August 29 - September 1, 1988    Toronto, Canada**

*Sponsored by*

**Chinese Language Computer Society**

*in cooperation with*

**Chinese Canadian Information Processing Professionals**

*Co-sponsored by*

**Philips Electronics Ltd., Montreal**

## **Session IIg Input/Output**

(Chair: Kemert K. Chow, *CCIPP*)

|                                                                                |     |
|--------------------------------------------------------------------------------|-----|
| <i>Conversion of Chinese Characters by Transformation Models</i> .....         | 293 |
| Y. Y. Tang, Z. C. Li, C. Y. Suen and T. D. Bui, Concordia University, Montreal |     |
| <i>Chinese Character Generator</i> .....                                       | 298 |
| H. Jurgensen and H. Y. Wang, University of Western Ontario, London             |     |
| <i>Evaluation of Chinese Coding Schemes by Fuzzy Model</i> .....               | 303 |
| Chen Wen Xi, Shanxi Mining College, Shanxi                                     |     |
| <i>Ideographic Character Synthesis</i> .....                                   | 307 |
| George Kostopoulos, Florida Atlantic University, Boca Raton                    |     |

## **Session IIh Input/Output**

(Chair: Shunji Mori, *Ricoh Research and Development, Japan*)

|                                                                                                               |     |
|---------------------------------------------------------------------------------------------------------------|-----|
| <i>JACM - Just Another Chinese Metafont</i> .....                                                             | 311 |
| Kam Pui Chow, Kai Ming Chan and Wai Man Lo, University of Hong Kong, Hong Kong                                |     |
| <i>A Chinese Indexing System Designed for Worldwide Use</i> .....                                             | 316 |
| Ling Y. Wei, National Chiao Tung University, Hsinchu                                                          |     |
| <i>CTEX: A TEX-based Word Processing System</i> .....                                                         | 321 |
| Tzao-Lin Lee, National Taiwan University, Taipei (short presentation)                                         |     |
| <i>Chinese Character Generator</i> .....                                                                      | 325 |
| Y. S. Chan, F. Y. L. Chin and S. Y. Leung, University of Hong Kong<br>Hong Kong (short presentation)          |     |
| <i>A Chinese Programming Language and Its Implementation</i> .....                                            | 329 |
| Ye Chengqing, Lu Jiping, Lu Wangxing and Wang Shengkang, Zhejiang University<br>Hangzhou (short presentation) |     |

## **Session IIIa Natural Language**

(Chair: Yaohan Chu, *University of Maryland*)

|                                                                                                  |     |
|--------------------------------------------------------------------------------------------------|-----|
| <i>Full-text Database for Chinese History Document</i> .....                                     | 334 |
| C. C. Hsieh, Z. K. Ding, Y. H. Wang, S. F. Tung, S. Lin and C. C. Shu<br>Academia Sinica, Taipei |     |
| <i>ADMS - An Automated Document Management System for Chinese Documents</i> .....                | 341 |
| Baw Jhiune Liu and Shun Lei Tuan, National Central University, Chung Li                          |     |
| <i>A Knowledge Engineering Approach to Natural Language Processing</i> .....                     | 346 |
| Paul Ling and Man-Tak Shing, University of California, Santa Barbara                             |     |

## **Session IIIb Natural Language**

(Chair: C. Y. Suen, *Concordia University*)

|                                                                                                                        |     |
|------------------------------------------------------------------------------------------------------------------------|-----|
| <i>Network Implementation for a Natural Language Translation Dictionary</i> .....                                      | 353 |
| Liana X. Ye, Sofix Inc., Campbell                                                                                      |     |
| <i>Deep Understanding of Japanese Queries in an Information Retrieval System</i> .....                                 | 358 |
| Shigeyuki Kinoshita, Y. Kanou, T. Takahashi and Y. Kobayashi<br>ATR Communication Systems Research Laboratories, Osaka |     |
| <i>Deterministic Parsing of Chinese Queries Through Attribute-Dependent Grammar</i> .....                              | 363 |
| Jian-Cheng Dai, Hsi-Jian Lee and Ting Liang, National Chiao Tung University<br>Hsinchu (short presentation)            |     |
| <i>Technical Periodicals Data Base Retrieval System</i> .....                                                          | 367 |
| Lian Yachun, Institute of Scientific and Technical Information of China<br>Beijing (short presentation)                |     |
| <i>Approaches on an Experimental Chinese Electronic Dictionary</i> .....                                               | 371 |
| Shih-shyeng Tseng, Meng-Yuan Chang, C. C. Hsieh and K. J. Chen<br>Academia Sinica, Taipei (short presentation)         |     |
